- Find a map at www.publichealth.columbus.gov

Who should attend?

Tattooists
Body piercers
Cosmetic tattooists
Public health professionals

Presented by David Vidra, CLPN, MA of Health Educators, Inc., this in-depth course is by far the most comprehensive industry-specific Bloodborne Pathogens training program currently available for the body modification industry. In addition to meeting federal requirements for bloodborne pathogen training, this course is specifically designed to meet Ohio's state educational requirements for training in bloodborne pathogens standard and infection control requirements.

The 8 hour class will consist of Bloodborne Pathogens and Infection Control which will be taught to body piercers, tattoo artists and public health professionals simultaneously. This includes information on sterilization, hand-washing and skin prep. The information delivered in the workshop is essential in order to ensure that all body modification procedures are being performed in a safe, responsible and legal manner.

The cost of Bloodborne Pathogens & Infection Control is \$135 per person. Course includes all necessary materials, copies of industry-specific OSHA interpretations, product samples, as well as a certificate of completion. A \$35 non-refundable deposit is required for each attendee. Deposits can be paid via money order, certified check, purchase order, or credit card directly to Health Educators. We request that all participants pre-register to ensure that enough materials are available. Meals and lodging are not included.

To register, contact Dave Vidra of Health Educators, Inc. at:

P.O. Box 771210	TEL: 216.623.0815
